

Prime minister Erna Solberg  
Postboks 8001 Dep  
0030 Oslo

Dear prime minister,

Norway's seabirds are disappearing. The seaweed forests are being emptied of life and are dying along the coast of Norway.

Every day we can see the trawlers tear up the seaweed forests for seaweed. Seaweed cleans the sea, it is also the home for billions of animals. We only hear excuses from the state, the plants have stopped growing back.

The Norwegian constitution paragraph 112 declares that everyone has a right to a clean environment and to harvest from nature, this law is being broken by the state in allowing a company to destroy our seaweed forest.

We demand that seaweed trawling is stopped and we demand to know why it has been allowed when it is causing so much damage.

From a concerned citizen
